

8TH EADV DERMATOLOGICAL MEETING IN TICINO 2016: FROM THE BENCH TO THE CLINIC

**1 DECEMBER 2016
INSTITUTE FOR RESEARCH IN BIOMEDICINE (IRB)
BELLINZONA, SWITZERLAND**

Introduction

Dear colleagues,

With the arrival of autumn, so is the 8th edition of the Scientific Meeting in Ticino promoted by the European Academy of Dermatology and Venereology.

The close and fruitful collaboration of the EADV organising committee with the Ticinese Dermatology Society, the Dermatology Department of Ente Ospedaliero Cantonale and the Institute for Research in Biomedicine has allowed us to come together to create this excellent joint project once again.

Strategically located between the mountains and the castles of the characteristic town of Bellinzona, this one-day meeting offers stimulating topics for researchers and dermatologists from both Switzerland and Northern Italy. It also captures the attention of allergologists, immunologists, internists and oncologists, by addressing areas with significant clinical and interdisciplinary overlap.

The programme starts with a basic research session in the morning and is followed by a clinical session in the afternoon. The schedule proudly features distinguished researchers and clinicians with recognised experience in their field to discuss a number of practical relevant advances in their fields.

Medical progress always profits from the co-operation of both researchers and clinicians by raising questions, designing clinical and scientific studies, applying new diagnostic and therapeutic methods and providing appropriate material and information on patients and diseases.

It is our pleasure to invite you to take part in this conference, an opportunity to exchange experiences and share approaches in our daily work.
